TEAM CHARTER

Course: Applied Project Capstone
Team Name: ___Two_____
Client/Project: _____Rainbows_____
Date Created: _____Jan 27, 2026_____

TEAM PURPOSE

Our team is working on a consulting-style project in partnership with a non-profit organization to address a real operational and strategic challenge using data analytics and project management approaches. The purpose of this project is to analyze the organization current processes and data, generate meaningful insights, and develop practical, actionable recommendations that support better decision making and organizational effectiveness. Our broader goal is to create positive social impact by helping the non-profit improve its services, efficiency, and long-term sustainability while strengthening our own consulting and professional skills.

ROLES & RESPONSIBILITIES

Team Member	Program	DISC Style	Role	Key Responsibilities
Bikash Ghimirey	AI & Data Science	Influence (I)	Team Lead & Analytics Coordinator	Overall project coordination, stakeholder communication, task tracking, data analysis support, integration of insights into final recommendations and report
Rahul Awale	AI & Data Science	Steadiness (S)	Data Engineer	Data collection, data cleaning, preprocessing, feature engineering, dataset documentation
Ramesh Kumar	AI & Data Science	Steadiness and Influence (SI)	Machine Learning Lead	Model development, tuning, evaluation, performance reporting, technical methodology documentation
Abdul Rehman	AI & Data Science	Steadiness (S)	Visualization & EDA Specialist	Exploratory data analysis (EDA), charts, dashboards, visual storytelling for client-ready insights

Aiswarya Hariharan	AI & Data Science	Steadiness (S)	Research & Documentation Lead	Literature review, problem framing, methodology writing, supporting final report development
Kirandeep Kaur	AI & Data Science	Steadiness and Influence (SI)	Quality Assurance & Testing Lead	Model validation, results checking, reproducibility testing, quality control of deliverables
Harsha Grewal	Global Project Management	Steadiness (S)	Project Manager	Timeline planning, milestone tracking, risk management, meeting facilitation, coordination across sub-teams
Gurpreet Singh	Global Project Management	Steadiness and Influence (SI)	Client Liaison & Process Analyst	Client communication support, requirements clarification, process documentation, stakeholder coordination

---

COMMUNICATION AGREEMENTS

Instructions: Define how you will communicate professionally as a consulting team. Include tools, expectations, and etiquette.

Collaboration tools/platforms:

WhatsApp for quick updates and urgent communication; Microsoft Teams for virtual meetings; Google Drive for shared documents and reports; GitHub for code repositories and version control.

Expected response time:

Team members are expected to respond within 12 hours on weekdays and 24 hours on weekends, unless marked urgent. Any anticipated delays must be communicated in advance.

Weekly meeting plan:

The team will hold one structured meeting per week (60 minutes) with a pre-shared agenda, documented action items, and assigned task owners. Additional ad-hoc meetings will be scheduled as needed for project milestones or client coordination.

Documentation and version control rules:

All documents will be stored in a shared Google Drive folder with standardized file naming conventions. Only one person will edit a document at a time unless using tracked changes. All code will be maintained in GitHub with clear commit messages, version history, and regular backups.

DECISION-MAKING PROCESS

The team will aim to make decisions through consensus by encouraging open discussion and considering all perspectives. If consensus cannot be reached within a reasonable time (15–20 minutes), the subject-matter expert for that topic (e.g., data, modeling, project planning) will provide a recommendation to move the project forward. If disagreement persists, the team lead will make a temporary decision for progress and escalate the issue to the instructor if necessary.

ACCOUNTABILITY COMMITMENTS

Check all that apply:
[x] Task deadlines with clear owners
[x] Weekly internal check-ins
[x] Transparent workload tracking
[x] Instructor support if patterns of non-performance emerge

Expectations:

All team members are expected to meet agreed deadlines, attend scheduled meetings, and contribute meaningfully to assigned tasks. Members must communicate risks, delays, or workload concerns at least 24 hours before a deadline. Each task will have a clear owner responsible for delivery and status updates.

Consequences for missed commitments:

Missed deadlines or unfulfilled responsibilities will first be addressed through a private conversation with the team lead or project manager. Repeated issues will be documented and discussed in a team meeting to realign expectations. Persistent non-performance will be escalated to the instructor for guidance and formal support.

CONFLICT RESOLUTION PLAN

Process to raise concerns: Team members will raise concerns privately and respectfully with the person involved or with the team lead or project manager. Issues should be communicated as early as possible, focusing on behaviors and project impact rather than personal criticism.

Mediation plan if needed: If a concern is not resolved through a one-on-one discussion, a structured team discussion will be facilitated by the team lead or project manager. If the issue remains unresolved or escalates, the instructor will be consulted for neutral mediation and guidance.

Guidelines for respectful dialogue: All discussions will assume positive intent, use calm and professional language, and focus on solutions rather than blame. Team members will practice active listening, allow equal voice, and avoid interrupting or dismissing others' perspectives.

PSYCHOLOGICAL SAFETY & TEAM CULTURE

Check any that apply:
[x] Respectful listening
[x] Equal voice
[x] Curiosity over judgment
[x] Encouragement of new ideas
[x] Celebrating wins
[x] Growth mindset & feedback welcome

Additional culture priorities:

We commit to professionalism, accountability, inclusivity, and mutual respect in all team interactions. We aim to create an environment where all members feel safe to ask questions, challenge ideas, and make mistakes without fear of judgment. We will support one another's growth, recognize individual contributions, and maintain a positive, solution-focused team mindset.
